

The first vintage of UKAN was characterised by the rain that fell during the year, especially in September when the grapes were almost fully ripen, postponing harvest to October. After the fermentation in open-top oak vats, and ageing for seventeen months, in may 2020 the single-vineyard wines were blended obtaining an elegant and balanced wine that shows the freshness of the year it was born in.

VINEYARD

REGION: DOCA Rioja

SUBREGION Rioja Alavesa
